Subject: Reference request - 1995 paper on skin prick testing in Sor-Vananger
Date: 02/07/2012 02:41 PM

Dear Dr. Dotterud:

I am looking for a paper of yours based on the Sor-Vananger study you conducted in the 1990's. The reference was described in a 2001 paper by Smedje and Norback (an incidence study of childhood asthma and allergies in relation to school formaldehyde levels), and it concerns the validation component of the study (i.e., how well questionnaire-based assessment of allergy compares to skin prick testing). Unfortunately, I have not been able to find this paper using PubMed. Can you tell me if this reference is correct, and if not, could you send me the correct citation? Or would it be possible for you to send me a copy of the paper? I would find it very useful, as I have found relatively few studies with these type of data.
